pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     DB seq length: 0

Appl. Environ. Microbiol. 62:80-86(1996).

-I-FUNCTION: PROMOTES COLLOIDOSMOTIC LYSIS BY BINDING TO THE MIDGU EPITHELIAL CELLS OF LEPIDOPTERA LARVAE. HAS A FAIRLY BROAD SPECTRUM OF ACTIVITY AGAINST MEMBERS OF THE FAMILIES PYRALIDAE, PLUTELLIDAE, SPHINGIDAE, AND NOCTUIDAE. IT IS THE FIRST INSECTICIDAL CRYSTAL PROTEIN WITH ACTIVITY AGAINST CUTWORMS. NO ACTIVITY IS OBSERVED AGAINST SOME BEETLES, SUCH AS COLORADO POT
                                                                                                                                                                                                                           16-OCT-2001 (Rel. 40, Last sequence update)

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                         Score
